PROFESSIONAL SUMMARY

B.Tech Computer Science and Business Systems student (expected 2027) with a strong base in DSA, OOP and DBMS. Built and deployed three full-stack projects (MERN, Flask/scikit-learn ML, Next.js/TypeScript with Gemini AI) and completed a MERN Stack internship. NPTEL Elite-certified in Cyber Security and Privacy (IIT Madras).

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Python, Java, C++, SQL
Frontend: React.js, Next.js, HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Design
Backend & APIs: Node.js, Express.js, Flask, RESTful APIs, JWT Authentication and Authorization, Nodemailer, Zod
ML Libraries: scikit-learn, Pandas, NumPy
Databases: MongoDB (Atlas), MySQL, Firebase
Cloud & Tools: AWS S3, Vercel, Render, Git, GitHub, Postman
AI Tools: ChatGPT, Claude, Google Gemini API
Core Concepts: DSA, OOP, DBMS, Operating Systems

PROJECTS

CloudVault – Cloud-Based File Sharing Platform | Deployed on Render
Live: cloudvault-1-9w0z.onrender.com | Code: github.com/PranavDDabade/cloudvault
Tech Stack: React.js, Node.js, Express.js, MongoDB Atlas, AWS S3, JWT, Tailwind CSS, Nodemailer
- Built RESTful APIs (Express.js) for file upload, download, preview and sharing, with files stored in AWS S3.
- Implemented JWT authentication with email verification and password reset (Nodemailer) and role-based access control so only authorized users can reach shared files.
- Built a responsive React dashboard with real-time storage analytics.

HeartInsights – Heart Disease Prediction App | Deployed on Vercel
Live: heartinsights.vercel.app | Code: github.com/PranavDDabade/heartinsights
Tech Stack: React.js, Node.js, Express.js, MongoDB, Python, Flask, scikit-learn, Bootstrap
- Built a full-stack web application that predicts heart disease risk in real time from clinical inputs using a scikit-learn model.
- Built a Python Flask service to serve the model, integrated with a Node.js/Express backend that passes patient inputs and returns risk predictions to the React interface.
- Designed a clean React.js and Bootstrap interface so users can enter patient data and read results at a glance.

BidBridge – B2B RFQ Marketplace | Deployed on Vercel
Live: bidbridge.vercel.app | Code: github.com/PranavDDabade/bidbridge
Tech Stack: Next.js, React, TypeScript, Firebase, Google Gemini, Tailwind CSS, Zod
- Built a B2B construction procurement platform that converts text or voice requests into structured RFQs, so buyers can review details and receive seller bids.
- Integrated Google Gemini to extract key fields from free-form requests and flag uncertain values for human review.
- Used TypeScript and Zod schemas for type-safe data validation.

WORK EXPERIENCE

MERN Stack Intern – Soft Nexis Technology (Remote) | Feb 2026 – Apr 2026
- Designed and developed responsive full-stack web features using React.js, Node.js, Express.js, MongoDB and Tailwind CSS.
- Built RESTful APIs and integrated a MongoDB database to store and serve application data.
- Collaborated with the team on GitHub, debugging issues and shipping new features.

EDUCATION

B.Tech in Computer Science and Business Systems, KIT College of Engineering, Kolhapur (SUK) | 2024 – 2027 (Expected)
SGPA: 7.99 | Coursework: Data Structures & Algorithms, DBMS, Operating Systems, OOP

Diploma in Computer Science and Engineering, Sharad Institute of Technology, Ichalkaranji (MSBTE) | 2021 – 2024
Percentage: 85.94%

CERTIFICATIONS

Cyber Security and Privacy – NPTEL (Elite), IIT Madras | Jul 2025 – Oct 2025
Cryptography, authentication, privacy, and network security (12-week course).
